SUMMARY

Full-stack Software Engineer, open-source contributor, and maintainer at Open Source Kigali, specializing in TypeScript, React, Next.js, and Nest.js, with backend experience in C# / .NET and event-driven systems. Experienced shipping production web applications in collaborative Agile teams for startups and agencies, and running community events that onboard new developers to Git and open source.

EDUCATION

African Leadership University, **Kigali, Rwanda**
BSc Software Engineering (ML Track) *January 2024 - Present*

- Software engineering foundations, algorithms, and system design
- Project-based full-stack development
- AI fundamentals and applied Machine Learning

The Gym Rwanda - Software Development Training, **Kigali, Rwanda**
Software Development Trainee *November 2024 - Present*

- Intensive training in modern web engineering.
- Peer programming with Git, TypeScript, React, TailwindCSS, and Nest.js
- Strengthened communication, public speaking, and technical collaboration skills

EXPERIENCE

Open Source Kigali, **Kigali, Rwanda**
Project Maintainer, *May 2026 - Present*

- Maintain the Official website of Open Source Kigali, owning both the frontend and backend codebases.
- Organize community events that teach new developers Git and GitHub workflows and guide them through their first open-source contributions.

WiyoCom Ltd - Marketing Agency, **Kigali, Rwanda**
Software Developer *April 2025 - January 2026*

- Built the *company website* and blog using React.js, TailwindCSS, and firebase
- Developed client websites including *Merap Ltd* using Typescript, Next.js and TailwindCSS

Safi Core - Software Agency **Gilroy, California**
Frontend Engineer *July 2025 - October 2025*

- Developed key features for Ottri *a cleaning services platform*
- Built user dashboard and core pages (Home, Services, Process) using Next.js, TypeScript, and TanStack Query
- Integrated Stripe payments and optimized data fetching and UX performance

OPEN SOURCE CONTRIBUTIONS

Waydroid - Contributed to project documentation *(PRs)*
Warp - Contributed to project Documentation *(PRs)*
Cockpit - Contributed to project Documentation *(PRs)*

PROJECTS

Car Sharing App - (GitHub | Deployed)

- Designed backend for vehicle booking and availability management with Nest.js, TypeScript, PostgreSQL, and raw SQL
- Applied layered architecture (controllers, services, persistence); wrote unit and integration tests with Jest

Product Catalogue API - (GitHub)

- Built an event-driven backend (C#, .NET 10, PostgreSQL, EF Core) that publishes domain events to Apache Kafka, keyed by product ID to preserve per-product ordering
- Added a background-service consumer with events emitted only after DB commit and safe degradation when Kafka is down; containerized with Docker Compose and unit-tested

Hollow Chat TUI - (GitHub | Releases)

- Cross-platform terminal chat app with public/private rooms (C#, .NET 10, Terminal.Gui) over a self-hosted TCP server
- Single-file client with no runtime dependency; Dockerized server with automated Linux/macOS/Windows releases

Whatsapp Spammer CLI - (GitHub | Deployed)

- Published npm CLI tool for automated WhatsApp messaging
- Built with TypeScript, Puppeteer, Chrome Remote Debugging

SKILLS & LANGUAGES

Frontend Technologies - React.js, Next.js, HTML, CSS, JavaScript, TypeScript, TailwindCSS
Backend Technologies - Nest.js, Express.js, C# /ASP .NET Core, Go (Basics of Gin)
Mobile Development - Flutter, Dart
Data & Streaming - Apache Kafka, Snowflake
Database & Cloud - MySQL, MongoDB, PostgreSQL, Firebase, Mongoose, TypeORM, Prisma, EF Core
Version Control - Lazygit, Git, GitHub
Soft Skills - Communication, Teamwork, Problem-Solving, Critical Thinking, Adaptability
Languages - French (C1), English (B2)
